# Different Views on Blockchain

# 1) High Level Overview

images:

<https://www.biggerpockets.com/renewsblog/2014/07/18/high-level-overview-literally-30-unique-real-estate-markets-around-world/>

When we interact/transact with others,  
we often delegate **Trust** to **Intermediaries**

If we had a trusted **Shared Ledger** many of those Intermediaries would no longer be necessary

1. Shared, distributed **Ledger**
2. Immediate **Consensus** on "State of the World"
3. **Tamper-Proof**
4. **Public**, anyone can access, validate
5. **Transactions** change the state

# How can we achieve a shared, trusted Ledger **without Trust between Parties?**

- Block = List of Transactions
- Blockchain = Chain of Blocks
  - Tamper-Proof
- Consensus (PoW)
  - Miners expend energy to find hash puzzle solution
  - Other nodes accept block if it is valid
- Trustless
  - Nodes assumed to be untrusted
  - Fair Lottery, Cryptography ensure that no one can cheat

# A **Consortium Blockchain** can address some Challenges Companies may find with Public Blockchains

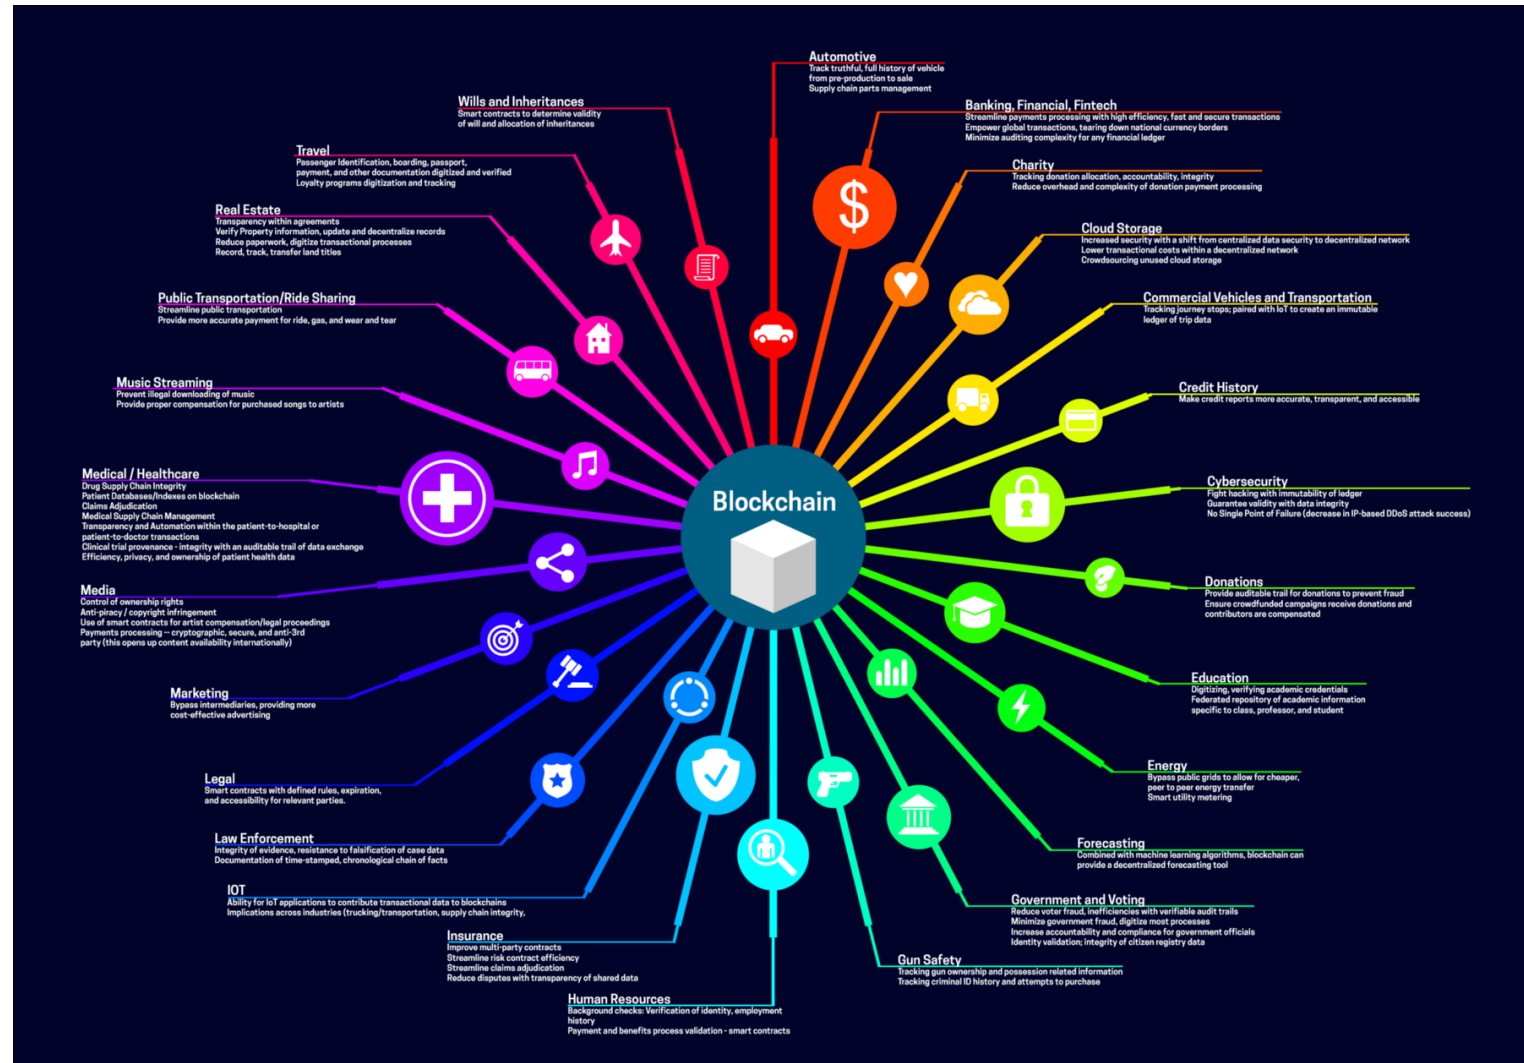

- Group of known, semi-trusted parties
- Access granted by members
- Consensus ~ majority vote (BFT)
- Consensus can withstand 1/3 of malicious nodes
- Easier Governance

Public	Consortium
Data is Public	Privacy, Confidentiality
Transactions are Public	Private Channels
Pseudonymous	Known participants
Anyone can join	Permissioned
Anyone can access	Permissioned
Trustless Nodes	Semi-Trusted Nodes
Low tx/s	High tx/s
	GDPR Compliance

# What are some of the Blockchain Use Cases for Companies?

- Data Exchange between multiple parties
- End-to-End Supply Chain Transparency
- Product Traceability
- Marketplaces, Trading
- Clearance & Settlement
- Public Registries

source: <https://medium.com/fluree/blockchain-for-2618-and-beyond-a-growing-list-of-blockchain-use-cases-37db7c19fb99>

# There is large interest in Blockchain **Adoption**, with many projects underway

Maersk	cargo tracking
Port of Antwerp	container handling
Walmart	supply chain transparency
Airbus	jet plane parts tracking
UPS	supply chain transparency
FedEx	customer dispute resolution
Australian Securities Exchange	clearance & settlement
Credit Suisse	syndicated loans
Dubai Land Dept.	land registry

# Consortium Blockchains

# Consortium Blockchains

- Hyperledger
  - Linux Foundation, Open Source
  - [Fabric](#) (IBM)
    - Kafka orderer, key-value store
    - Go, Java
    - Federated Channels, Private transactions
  - [Sawtooth](#) (Intel)
    - larger networks, PoET
    - transaction families
  - [Burrow](#) (Monax)
    - Ethereum fork
    - Tendermint BFT
  - Composer
- [Quorum](#) (JP Morgan Chase)
  - RAFT, Istanbul BFT
  - Ethereum fork
  - Privacy, Confidentiality

# Shameless Plug: Clárú is bringing **Traceability** to the Irish **Dairy** Sector

## 2) Meetup Consensus

# Blockchain Artefacts

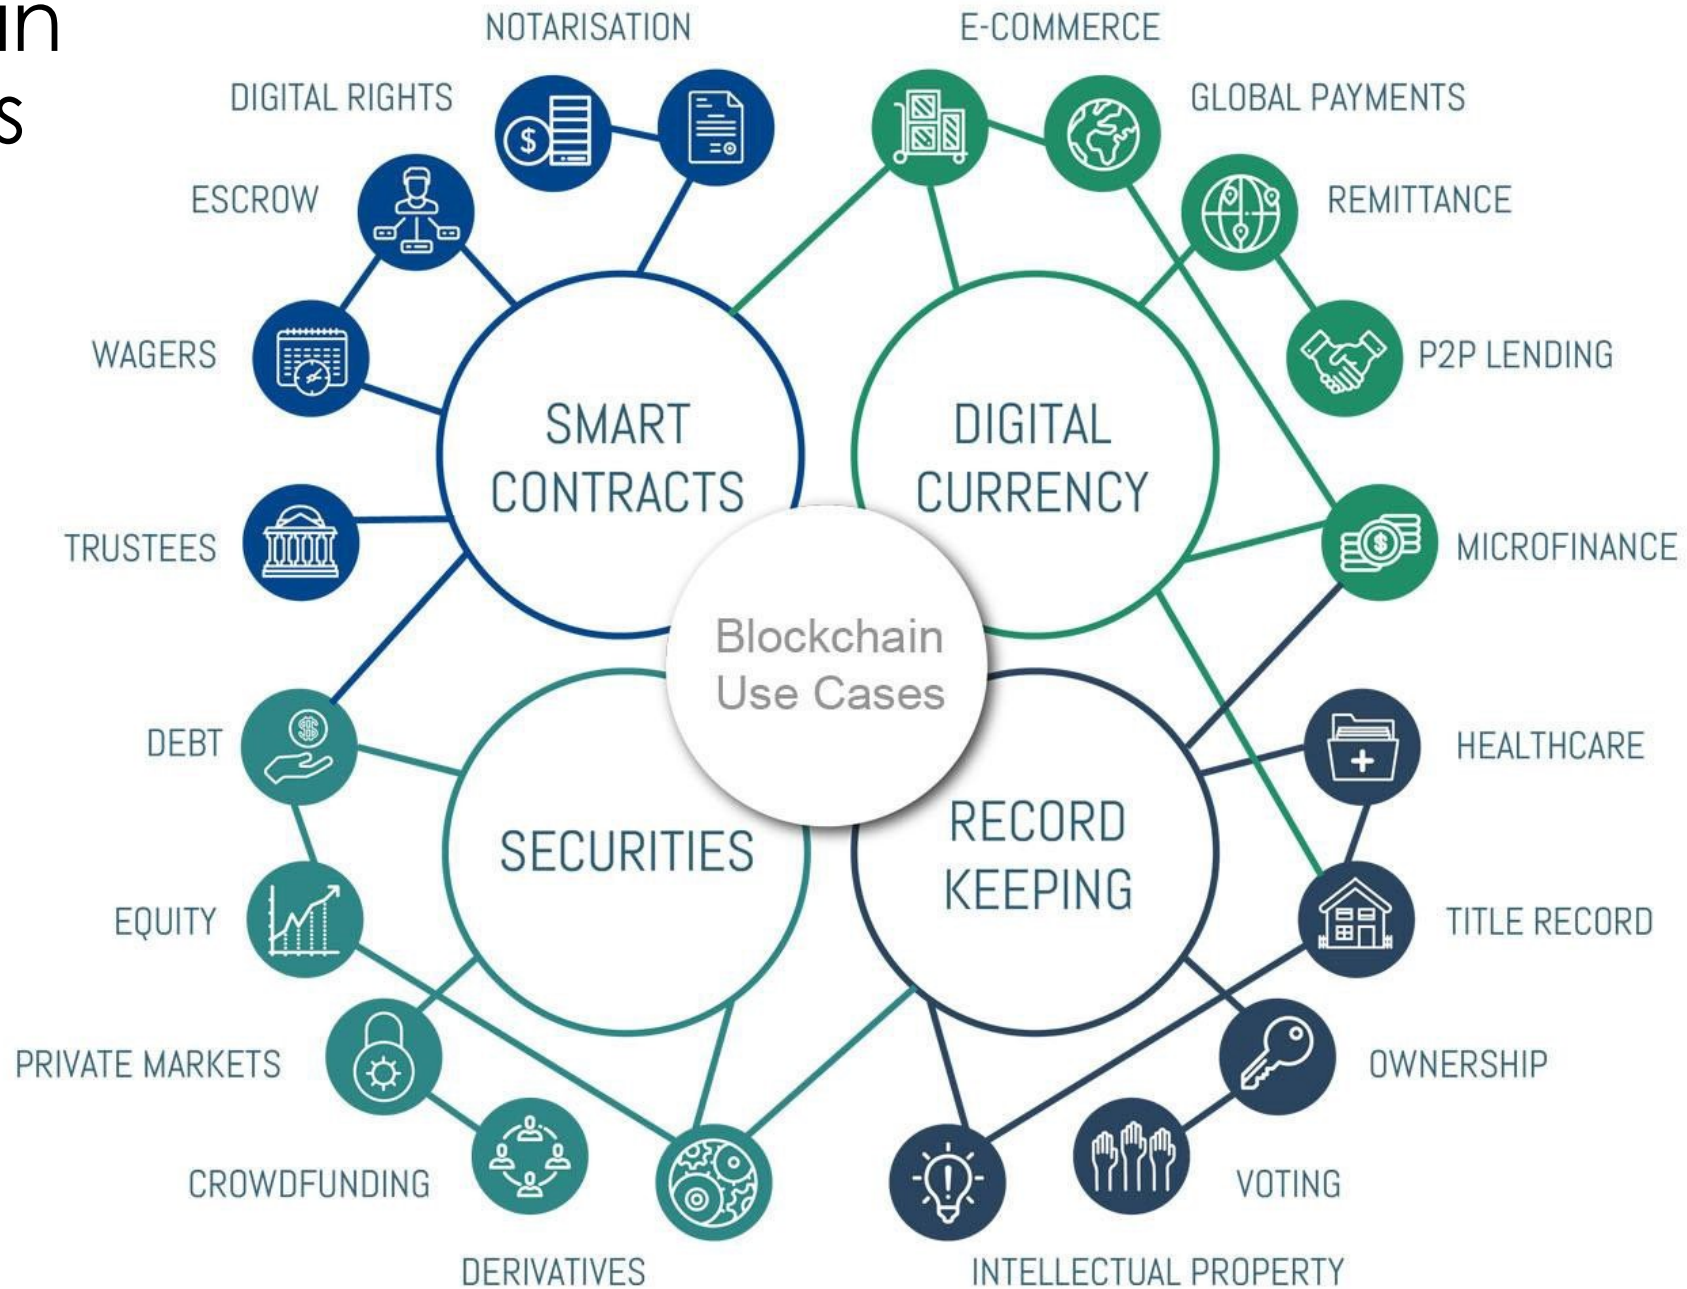

# Blockchain Properties

# Blockchain Use Cases

# 30 Non-Financial Use Cases of Blockchain Technology

# Do you want to know more?

- Meetup: [Cork Blockchain](#)
- Slides, Material on [corkblockchain.com](http://corkblockchain.com)
- Upcoming "Blockchain in Practice" Event at UCC, date TBD => [claru.io](http://claru.io)
- Good MOOCs
  - Coursera ([Bitcoin and Cryptocurrency Technologies](#))
  - University of Nicosia ([DFIN-511 Introduction to Digital Currencies](#))
    - Also offer MSc Digital Currencies

**Thank you,  
any questions?**
